AT THE END OF PROHIBITION. AT THE FOREFRONT OF A NEW BEGINNING.

1933 Industries' objective is to capitalize on the opportunities resulting from the end of Cannabis Prohibition in Canada and the legalization of the industry in several US States. The Company's vision is to establish a foothold in several distinct parts of the value chain of the North American medical and adult use cannabis industries and replicate its model in other jurisdictions where permitted by law or regulation.

NEVADA: One of the most attractive cannabis markets in the US, providing a solid backdrop for rapid growth

- First to obtain medical cannabis license in southern Nevada
- Longest growing history of any medical marijuana establishment in Nevada
- Building required infrastructure to rapidly scale up cannabis production

ESTABLISHED CONSUMER PRODUCTS

- Strong foothold in both legalized cannabis from cannabidiol (CBD) and tetrahydrocannabinol (THC) products
- Established brand identity and consumer loyalty with growing sales and margins
- Growth of CBD due to its potential therapeutic applications for a variety of conditions
- Huge opportunity in hemp-derived CBD and high-quality CBD branded products that have wide appeal

- Establishing hemp-processing and CBD extraction vertical with few competitors in the market

EXPANDING CAPACITY

- Moving from 12,000 sq. ft. total cultivation and production capacity to a state-of-the-art, newly built 67,750 sq. ft. cultivation-only facility
- Expanding production space to 12,160 sq. ft.
- Establishing a new hemp processing facility to produce CBD extracts for full spectrum oils, distillates and isolates

CANNABIS EXPERTS, LIFELONG ENTREPRENEURS

- Operational expertise with cannabis industry and public market professionals
- Leadership includes long-time cultivators, cosmetic industry professionals, regulators, marketers and financiers.
